Fluidized Bed User Survey

BETE Fog Nozzle is currently developing a new air distributor nozzle for fluidized beds, and would like your help in addressing any problems experienced with current designs. By completing this survey, you are helping BETE to continue to provide the best products possible to our customers. All information will be kept strictly confidential and only used for air distributor nozzle development purposes.

Company Information:

Company Name:	
Contact Name:	
Title:	
Telephone:	Fax:
Email:	

Boiler Information:

Who is the original OEM of your Boiler?	
What type of boiler do you use (CFB, BFB, etc)?	
What is the boiler diameter (or dimensions if not round)?	
What is the air consumption during normal operating conditions?	
What is the plenum or manifold pressure at this condition?	
How many air distributor nozzles are used in your boiler?	

Air Distributor Nozzle Information:

On a 1 to 10 scale, how would you rate the performance of the nozzles?	
Do you have any clogging problems?	
Do you have problems with nozzle wear?	
How often are nozzles repaired/replaced?	
Do you have any issues with poor fluidization?	
Are any additional air jets used to initially fluidize the bed on startup, or is the nozzle air sufficient?	

Thank You!

When completed, please Fax or E-mail to Sean Pringle (appeng@bete.com, Fax: 413-772-6729).
