

# Twist & Dry®

## Twist & Dry Component System

The Twist & Dry® series of nozzles was designed and developed for the spray drying industry, with the dryer operator specifically in mind. The patented locking system locks the swirl and orifice components into place prior to installation on the spray lance, eliminating many of the hassles associated with replacing wear parts and allowing for easier installs. Through continuous development and innovation, BETE offers solutions for high pressure, high temperature, and abrasive media applications.

### DESIGN FEATURES

- Product consistency
- Premium tungsten carbide disc available for extended wear life
- Hand tighten - no special tools required for assembly
- Easy to maintain
- Clog-resistant design
- 218SS body for anti-galling

### SPRAY SET-UPS

The spray angle and flow rate of a Twist and Dry assembly is determined by the swirl and orifice combination. The Twist & Dry series has almost 1,000 different combinations of swirl and orifice discs to provide flow rates and spray angles that best to fit your needs. To locate the right swirl and orifice combination refer to the following TD/TD-K and TDL pages.

TD swirl disc

TD orifice disc

### TD Series

The original TD series features BETE's innovative and patented locking lug feature, single piece thick swirl component, clog-resistant design, and multiple carrier options to provide ease of installation, operation, and maintenance.

- BETE's patented lug design
- Clog-resistant design

### TDL Series

The TDL series offers a compact nozzle design that is ideal for small-scale applications and pilot testing.

- BETE's patented lug design
- Small-scale applications
- Pilot testing

TDL Assembly

HT Assembly

### TD-K High Pressure Design

The TD-K series incorporates a PEEK back-up ring and optional Duplex carrier to allow for operation in high-pressure applications. Higher operating pressures can help increase yield, saving time and money. The TD series includes:

- TD-7K: rated for 485 bar
- TD-10K: rated for 690 bar

Viton 90 O-ring also available

Side View: TD-K body with PEEK backup ring

### High Temperature (HT) Design

The HT set-up utilizes a special body design and carrier #7 to replace the traditional O-ring seals with metal gaskets, allowing for operation at high temperatures.

- HT rated for 485 bar at 427 °C
- No O-rings

### TD/TD-K Drip Pro Check Valve

The TD Drip Pro check valve's patented design offers a high-flow solution to reduce drips which can lead to scorched particles and ruined product.

- Fits standard BETE carriers
- Replaces standard TD/TD-K bodies (except HT set-up)
- Drip-free operation
- Easy to assemble

Drip Pro Check Valve

Same day shipping for wear parts!

### Tungsten Carbide Options

Pro Grade	Suitable for most general spray drying applications
Premium Grade	Superior wear resistance for extremely abrasive spray media

## Twist & Dry® Hollow Cone

### DESIGN FEATURES

- Patented locking mechanism for quick and easy change-out and maintenance

### High pressure applications:

- TD-K with PEEK backup ring
- HT body with Carrier #7

### High temperature applications:

- TD/TD-K bodies with silicone O-ring
- HT body with Carrier #7

- Female-threaded or butt weld connections
- Hand tighten, no special tools required
- Orifice size: 0.864mm through 3.99mm
- Interchangeable swirl and orifice discs for variable patterns and flow rates

- Drip Pro check valve available upon request
- **Multiple grades of tungsten carbide to suit application needs**

- Same day shipping of wear parts
- Clog-resistant design
- Easy to maintain

### SPRAY CHARACTERISTICS

**Spray pattern:** Hollow Cone

**Flow rates:** 35.3 to 8,379 L/h

**Spray angle:** 50° through 85°, as listed

## Twist & Dry® Low Flow Hollow Cone

### DESIGN FEATURES

- Patented locking mechanism for quick and easy change-out and maintenance
- Lower flow rates than the Twist & Dry series
- Female-threaded or butt weld pipe connections
- Orifice size: 0.457mm through 1.47mm
- Interchangeable swirl and orifice discs for variable patterns and flow rates

### SPRAY CHARACTERISTICS

- Hollow Cone
- Flow rates:** 11.3 to 416 L/h
- Spray angle:** 70° - 75°

Ideal for small-scale applications and pilot tests

Female

70° Hollow Cone

Pipe Size	Weight (g)
1/4"	119

$$\text{Flow Rate (L/h)} = K \sqrt{\text{bar}}$$

Standard Materials: Carrier: Stainless Steel; Body: Stainless Steel; Swirl/Orifice: Tungsten Carbide

Spray angle performance varies with pressure. Contact BETE for specific data on critical applications.
